PROFILE

Final-year Computer Science & Software Engineering student at Maynooth University (graduating 2026) who ships production full-stack products end to end, not just coursework. Designed, built and deployed two live applications on Next.js, TypeScript and Supabase, backed by 100+ automated tests, CI/CD and Row-Level Security on every table.

Also a part-time quantitative researcher who built automated trading systems generating approximately \$15,000 in live profit. Seeking graduate software engineering roles on product or fintech teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL, PineScript, HTML, CSS, C++	Tools & Platforms: Git, GitHub Actions, Supabase, PostgreSQL, MongoDB, Vercel, Postman, VS Code, TradingView
Frameworks & Libraries: React, Next.js, Node.js, Express, Tailwind CSS, Framer Motion, Chart.js, Vitest, Playwright, pytest	Concepts: RESTful APIs, CI/CD, automated testing, Row-Level Security, SSR/SSG, algorithmic trading, backtesting, data visualisation

EXPERIENCE

Quantitative Researcher (Part-Time), DLT Capital

- Maynooth Feb 2025 - Jul 2025
- Built and tested automated Bitcoin trading bots in PineScript on TradingView, encoding systematic entry/exit, position sizing and risk-management logic.
 - Developed fully rules-based crypto and futures strategies, validated with statistical filters and strict risk controls.
 - Generated approximately \$15,000 in live trading profit through disciplined, systematic execution.

Sales Assistant (Part-Time), Circle K

- Dundrum Jul 2023 - Apr 2025
- Ran high-volume POS and cash handling under time pressure across a two-year tenure, holding accuracy and service standards through peak periods.

First Aid Assistant (Volunteer), Resus First Aid Ireland

- Dublin Nov 2022 - Present
- Assess and respond to medical emergencies, applying first aid calmly and documenting incidents to health-and-safety protocol.

PROJECTS

Personal Performance OS

- Next.js · TypeScript · Supabase · Groq AI · [Live App](#)
- Designed, built and shipped a live full-stack "performance OS" solo: Supabase auth over a 25-table PostgreSQL schema with Row-Level Security on every table (12 migrations).
 - Integrated streaming AI coaching and day-planning (Groq Llama 3.3 70B) with prompt-injection hardening and persistent rate limiting.
 - Backed by 94 Vitest unit tests plus Playwright end-to-end tests, GitHub Actions CI, ESLint/Prettier and light/dark theming; deployed on Vercel.

Maken, Combat-Sports Weight-Cut SaaS

- Next.js · TypeScript · Supabase · Groq AI · PWA · [Live App](#)
- Built and launched a freemium web app that helps judo and BJJ athletes plan competition weight cuts; live with real alpha users.
 - Shipped streaming AI estimates and training plans (Groq), Upstash Redis rate limiting, Resend email automation and an installable offline PWA.
 - Engineered full technical SEO (JSON-LD, sitemaps, long-form content) and GDPR-compliant data export and deletion.

Trading Analytics Dashboard

- TypeScript · Next.js · Python · Vercel · [GitHub](#) · [Live App](#)
- Built a full-stack trading research dashboard with a TypeScript/Next.js frontend and Python-backed analytics workflow.
 - Structured with reusable components, schemas, tests and deployment config; documented and deployed live to Vercel.

Vectorised Backtesting Engine

- Python · pytest · GitHub Actions · [GitHub](#)
- Developed a vectorised Python backtesting engine with modular strategies, reusable engine logic, test coverage and automated CI.
 - Implemented SMA-crossover, RSI mean-reversion and IFVG/CISD experiments with reproducible walk-forward analysis.

Algorithmic Trading Strategy, Final-Year Project

- Pine Script v6 · TradingView · NQ1! Futures · [GitHub](#)
- Designed a rule-based NASDAQ-100 E-mini futures strategy (Inverse Fair Value Gaps, Change in State of Delivery, liquidity-sweep filter): 56.94% win rate, \$28,400 net profit and 1.703 profit factor on 2025 to 2026 data.
 - Reported weaker out-of-sample 2023 to 2024 results to show awareness of overfitting and market-regime risk.

EDUCATION

B.Sc. (Hons) Computer Science and Software Engineering

Maynooth University Sept 2022 - Expected 2026

Relevant modules: Algorithms & Data Structures, Software Testing, Databases, Web Information Processing, Computer Systems, UX/UI Design.

ACHIEVEMENTS & INTERESTS

- Judo black belt, 16 years competitive:** multiple Irish national medals; competed at regional, national and international level.
- Algorithmic trading:** funded account with verified real payouts; builds and runs systematic strategies bridging research and live execution.
