PROFESSIONAL SUMMARY

Computer Science & Software Engineering graduate (Maynooth University, September 2026, 2:1 Honours) working across quantitative research and software engineering. Built a six-phase, pre-registered research program (176-test CI suite) that honestly disproved a \$28,400 backtest edge across 10 years and three futures markets, and earned ~\$15,000 in real trading profit as a part-time quant researcher & software engineer. Ships full-stack products in TypeScript/Next.js and Python/FastAPI, and AI-powered apps with LLM integration and agentic automation. Seeking graduate and early-career roles in software engineering, quantitative development, fintech or AI.

CORE COMPETENCIES

Full-Stack Development

Quantitative Research

Backtesting & Statistics

Test-Driven Development

CI/CD Pipelines

LLM/AI Integration

WORK EXPERIENCE

DLT Capital

Feb 2025 - Jul 2025

Quantitative Researcher & Software Engineer (Part-Time)

Maynooth, Ireland

- Researched and implemented systematic trading strategies generating ~\$15,000 in live profit, using technical analysis, statistical filters and strict risk rules.
- Built and tested automated crypto/futures trading systems and the supporting backtesting software used to research, validate and monitor live strategies.

Circle K

Jul 2023 - Apr 2025

Sales Assistant (Part-Time)

Dundrum, Dublin

- Handled POS, payments and cash accurately in a high-volume forecourt while keeping service and stock standards under peak pressure.

PROJECTS

Quantitative Strategy Research Program

Six-phase, pre-registered research program (176-test CI) with a no-lookahead backtest engine and walk-forward validation that rigorously proved a promising \$28,400 backtest edge was not real — avoiding a costly false positive — across 10 years and three futures markets (1,402 out-of-sample trades).

Python, pandas, NumPy, pytest, GitHub Actions

Trading Analytics Dashboard

Full-stack trading journal (228 commits) that logs real trades and surfaces win-rate, equity-curve and calendar analytics: TS/Next.js front end with auth + a Python/FastAPI back end; typed schemas, tests, live on Vercel.

TypeScript, Next.js, FastAPI, Python, Vercel

Jarvis — Voice-Driven AI Assistant

Personal AI assistant, solo zero-to-production, that runs a daily automated briefing email and handles projects and tasks by voice: Next.js voice UI, Supabase back end, LLM integration.

Next.js, TypeScript, Supabase, LLM

EDUCATION

B.Sc. (Hons) Computer Science and Software Engineering Maynooth University

Sept 2026

2:1 (Upper Second-Class Honours). Modules: Machine Learning & Neural Networks, AI & Language Processing, Parallel & Distributed Systems, Algorithms & Data Structures, Software Testing & Verification, Databases. Industrial placement: DLT Capital.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, C++, SQL, PineScript, HTML, CSS

Frameworks: React, Next.js, Node.js, Express, FastAPI, pandas, NumPy, pytest, Vitest, Tailwind CSS

AI/ML: LLM integration (Anthropic, Groq), prompt engineering, AI agents & tool-use (MCP), applied ML & meta-labelling

Tools: Git, GitHub, GitHub Actions, Supabase, MongoDB, Vercel, Jupyter, Postman, TradingView

Interests: Judo black belt (16 yrs, multiple Irish national medals); funded algorithmic-trading account with verified payouts
